IETF 94 (Virtual) October 27, 2015

Status

- IETF 93 Inter-op test worked!
 - Tested several clients & servers
 - No bugs in RFC 7285 – all failures were human slip-ups
 - Lead to on-line test tools:
Server: `http://alto.alcatel-lucent.com:8000/directory`
Client: `http://www.wdroome.com/alto/interop-93-client.php`

- Which leads to

Should we make this test suite permanent?

- That is, should we
 - Put inter-op test document on the RFC track
 - Promote as acceptance test for ALTO clients & servers
- Does IETF have a policy on this?
