CCNx document updates

Marc Mosko (marc.mosko@parc.com)

ICNRG (San Francisco, CA, USA) October 3, 2015

Semantics document updates

- Sections renumbered due to adding Change Log
- Added comments on Interest looping
 - Paragraph that clarifies that the HopLimit does not prevent loops, it only terminates them.
 - There is active research in other methods to terminate loops quicker than monotonically decrementing the HopLimit while still not requiring significant storage on intermediate nodes.

Messages document updates

- Sections renumbered due to adding Change Log
- Renamed fields of Link
 - “Optional KeyId” to “Optional KeyIdRestriction”
 - “Optional ContentObjectHash” to “Optional ContentObjectHashRestriction”
