Remember the past, 1997?

RISE OF THE STUPID NETWORK

The Rise of the Stupid Network was originally written during a single long weekend in May 1997 by David Isenberg while he was an employee of AT&T I also Research. It was officially released onto the Internal has The Rise of the Stupid Network was originally written during a single long weekend in May 1997 by David Isenberg while he was an employee of AT&T Labs Research. It was officially released onto the Internet by Island 1997. It was printed (without permission, with some had editing and with the last few hundred without permission, with some had editing and with the last few hundred. Isenberg while he was an employee of A1&1 Labs Research. It was officially released onto the Internet by June 1997. It was printed (without permission, with some bad editing, and with the last few hundred truncated) by Computer Telephony in its August 1007 issue If you want to cite an official, public, printed version, cite Computer Telephony, August 1997, pg 16-26 truncated) by Computer Telephony in its August 1997 issue.

Isenberg left AT&T in January 1998. Shortly after that, AT&T asked Isenberg to remove The Rise of the Network from the isen com website. Isenberg wanted to make AT&T happy so he took it off. It didn't wanted to make AT&T happy so he took it off.

Isenberg left Al &1 in January 1998. Snortly after that, Al &1 asked Isenberg to remove Ine kise of the Network from the isen.com website. Isenberg wanted to make AT &T happy so he took it off. (It didn't vise still not happy) is still not happy.)

is still not happy.)

My take for 2017: The rise of the stupid infrastructure

e2e-encryption, trustless, your definition of scalable etc

... just follow the libertarian impulse behind blockchains
