IETF CALEXT Interim Meeting

Wednesday October 10, 2019
Colocated with CalConnect XLVI

Note Well

This is a reminder of IETF policies in effect on various topics such as patents or code of conduct. It is only meant to point you in the right direction. Exceptions may apply. The IETF's patent policy and the definition of an IETF "contribution" and "participation" are set forth in BCP 79; please read it carefully.

As a reminder:

•By participating in the IETF, you agree to follow IETF processes and policies.

•If you are aware that any IETF contribution is covered by patents or patent applications that are owned or controlled by you or your sponsor, you must disclose that fact, or not participate in the discussion.

•As a participant in or attendee to any IETF activity you acknowledge that written, audio, video, and photographic records of meetings may be made public.

•Personal information that you provide to IETF will be handled in accordance with the IETF Privacy Statement.

•As a participant or attendee, you agree to work respectfully with other participants; please contact the ombudsteam (https://www.ietf.org/contact/ombudsteam/) if you have questions or concerns about this.

Definitive information is in the documents listed below and other IETF BCPs. For advice, please talk to WG chairs or ADs:

•BCP 9 (Internet Standards Process)
•BCP 25 (Working Group processes)
•BCP 25 (Anti-Harassment Procedures)
•BCP 54 (Code of Conduct)
•BCP 78 (Copyright)
•BCP 79 (Patents, Participation)
•https://www.ietf.org/privacy-policy/ (Privacy Policy)

Agenda

- Introduction, Note Well and Agenda Bashing 5m
- Current Drafts: 35m
  - draft-ietf-calext-eventpub-extensions 10m
  - draft-ietf-calext-jscalendar 10m
  - draft-ietf-calext-subscription-upgrade 5m
  - draft-ietf-calext-valarm-extensions 5m
  - draft-ietf-calext-scheduling-controls 5m
- Proposed Drafts: 35m
  - draft-gunter-calext-maintenance-notifications 15m
  - draft-ietf-vpoll 5m
  - draft-douglass-icalendar-series 15m
- Other business: 15m

eventpub

- Nearly done!

- Mike has submitted v15 which addresses most of the feedback

- Will make location type multi-valued (aligns with JSCalendar)

- Open issue: URI usage (Barry)

jscalendar

- Really really ready for last call!

- Some small changes
  - Added @type to all subobjects
  - Added IANA registries
  - recurrenceId
  - AbsoluteTrigger alerts

Jscalendar questions at CalConnect

- Make Participant#roles optional?
  - Remove the attendance property and map to new roles instead.
  - Make default be "informational" and hence it's optional
- Add a Location#type property with values from the registry defined in RFC4589?
  - Is also in eventpub
  - Yes: we should copy it!
- Add busy-tentative and busy-unavailable values for freeBusyStatus (i.e. map to FBTYPE as well as TRANSP)
  - Can register later if needed.
- Allow for specification of new properties in the IANA registry itself, rather than an informational RFC?
  - If it's simple enough to explain in the registry, then it should be fine! Don't prohibit.
  - Expert review decides if an RFC is needed.
  - Reserved registration followed by RFC for complex things.

Subscription upgrade

- Mike

- Want to update to emphasise data savings for mobile clients.

- Expect close to last call.

Valarm extensions

- Ken

- Will resurrect text discussing "related to" property for snoozed alarm pointing back to original.

- Close to last call.

Scheduling controls

- Bron

- It expired!

- Have mostly updated based on feedback from the list

- Main open question: do we need "Schedule-User-Address", and if so should it be multi-value?

calext-maintenance-notifications

- From Twitch

- Discussion from list: should it use eventpub?

- Call for adoption

vpoll

- Mike

- Want to change VVOTER to PARTICIPANT

- Keen to get it updated before anybody implements what's currently there!

- Will separate "Basic mode" and "Core spec".

- "Reverse scheduling" - e.g. requesting an appointment with a doctor, where the askee becomes the attendee.

- Next step: update and submit a new draft with correct name.

icalendar series

- Mike
- Spec is pretty complete.
- Next steps: call for adoption

Any other business?

- We have asked for 1 hour at IETF106 in Singapore.

- Any other upcoming work?

- Please review docs that are close to last call!
