Agenda

RFC 8610

Charter

CBORbis

— Look at updates so far
— To do

CDDL, Tags

— Contemplate (lack of) progress
CBORbis status

Most pull requests merged (thanks to the contributors!)

— Remaining pull requests:
  — Validity for tagged items (#18): non-core types
  — Security considerations update (#69): retain some of the existing text
— Need to re-check issues

⇒ –06 RSN
CDDL plan

Have a discussion for objectives of module system on mailing list

Have a roadmap proposal at 2019-07-03 interim
Other todos

— Array tags?
  — Need to close two remaining issues:
    — Editorial
    — Use case for homogeneous
— Oid split
— CBOR sequence
