

# cbor

2019-06-19 virtual interim

# Agenda

RFC 8610

Charter

CBORbis

- Look at updates so far
- To do

CDDL, Tags

- Contemplate (lack of) progress

# CBORbis status

Most pull requests merged  
(thanks to the contributors!)

- Remaining pull requests:
  - Validity for tagged items (#18): non-core types
  - Security considerations update (#69): retain some of the existing text
- Need to re-check issues

→ -06 RSN

# **CDDL plan**

Have a discussion for objectives of module system on mailing list

Have a roadmap proposal at 2019-07-03 interim

## Other todos

- Array tags?
  - Need to close two remaining issues:
    - Editorial
    - Use case for homogeneous
- Oid split
- CBOR sequence
