NMRG meeting/workshop in Bologna (Fall 2019)

- Focus on IBN

- Expected attendance – how many people?

- Balance presentation/discussion with hands-on sessions
  - presentation/discussion on IBN topics (architecture, language, etc.)
  - hands-on: a sort of "hackathon" or implementation/validation of IBN concepts/systems/tools (simulation or PoC in a lab environment)
    - sort of warm-up/test in view of a participation to IETF Hackathon (e.g. IETF106/Singapore, November 2019, or Q1-2020)

- Any proposals?
