

# Endpoint Posture Collection Profile

IETF SACM WG Virtual Interim Meeting

06/25/2019

# Changes for -05

- Updated the diagram so the Evaluator and Repository are "current work"
- Clarified how the PCE can push data, respond to queries, and establish secure transport connectivity for fulfilling subscriptions
- Expanded on the future work around leveraging NETCONF, RESTCONF, and YANG Push for network devices
- Documented the need to reassess MAC addresses as a device identifier
- Made various typographical and editorial changes

## Next Steps

- Incorporate any additional feedback from the WG
- Submit for WGLC and publication
