Available Data

Data is 80% perspiration, 10% great idea and 10% output. We spend hours making datasets work, reformatting PDFs (and maps views), matching information from plain text sources. Mostly, acting as the bridge between the data (and those who are pretty much hopeless at explaining it) and the people out there in the real world who wants to understand what that's story is all about.” – [Facts Are Sacred](#)

MIT Policy Hackathon 2019

APRIL 5-7, 2019 • STATA CENTER, CAMBRIDGE, MA

Interested in the future of healthcare? AI & cybersecurity? Energy & climate?

Join us in exploring these pressing challenges, and more, over the course of an exciting weekend at MIT.

The 2019 hackathon has passed and proceedings from the event are available in the link below. If you're interested in future events, be sure to join the mailing list to stay updated!

We're excited to share the proceedings from our third event, the 2019 MIT Policy Hackathon. The proceedings contain all the policy papers created by our hackers, plus information about the challenges and event.

Data Science For Social Good

Summer Fellowship

Carnegie Mellon University

We're training data scientists to tackle problems that really matter.

Datawrapper

Approach

We build a database with public data and started to build a map that we could open to the community.

And at the same time providing an API so anyone can benefit from it too.

46.25%

Of the network initiatives we found have a website.

36

global public-policy programs
related specifically to access
initiatives

5 Countries

Concentrate the initiatives

Let's take a look at

- “database”
