Guidelines for Human Rights Protocol and Architecture Considerations

draft-irtf-hrpc-guidelines

Gurshabad Grover and Niels ten Oever
HRPC @ IETF107

Objective

- Create a document for human rights guidelines (based on RFC8280)

Changes from -03 to -04

- Added some explanations to guidelines (in the connectivity section)

- Incorporate question suggested by Karan (in his review of draft-dnsop-server-stale): intended document status

- Misc. editorial changes

Upcoming changes

- Add explanations to guidelines where none currently exist

- Attribution question brought up John Curran
    - Potential conflict with anonymity, possibly no consensus at the moment
    - Will bump the thread

Open questions + how you can help

- Help with this research: review drafts using the guidelines, and email the hrpc list with what you think

- If you're writing a Human Rights Considerations section, tell us if you think the guidelines were useful
