

# **FLIC Discussion @ ICNRG Interim**

August 3, 2020

## Current Status

- Current Version has expired and needs to be refreshed  
Datatracker:
  - <https://datatracker.ietf.org/doc/draft-irtf-icnrg-flic/>
- Status from IETF 106 still relevant:
  - <https://www.ietf.org/proceedings/106/slides/slides-106-icnrg-flic-update-dave-oran-00>

# Resources

---

- FLIC spec: <https://github.com/mmosko/icn-flic-manifest>
- The Python implementation of CCNx 1.0 (partial) with the new FLIC manifests: <https://github.com/mmosko/ccnpy>
- FLIC group key proposal:  
<https://github.com/mmosko/ccnpy/blob/master/FLIC%20Group%20Key%20Proposal.docx>
- Initial thoughts on FLIC key wrapping:  
[https://github.com/mmosko/ccnpy/blob/master/flic\\_keywrap.md](https://github.com/mmosko/ccnpy/blob/master/flic_keywrap.md)
- Some worked-out examples of manifest structures:  
[https://github.com/mmosko/icn-flic-manifest/blob/master/FLIC\\_Update.md](https://github.com/mmosko/icn-flic-manifest/blob/master/FLIC_Update.md)

## Plan for this Discussion

- Go quickly over the last update slides (DaveO)
- Decide what needs to go into a refresh of the draft
- Generate a list of action items to get us ICNRG Last Call
- Assign victim(s) for each action item
- Goal: Last Call *Before* IETF109 (November)
