

Handling Message Disposition Notification with JMAP

Raphaël Ouazana <raphael.ouazana@linagora.com>

draft-ietf-jmap-mdn-10

JMAP Interim Meeting June 2020

Last changes (1)

- Wording
 - Fill up abstract
 - forEmailId constraints
 - invalidArgument instead of invalidProperties
 - Case sensitive properties

Last changes (2)

- Capabilities
 - Only accountCapabilities
 - Still MUST be present in capabilities

Last changes (3)

- finalRecipient
 - Can be set by the client
 - Implies some security concerns and to check with identities

Last changes (4)

- SetError instead of the undefined MDNError
 - Need to register some types?

Last changes (5)

- Keyword \$mdnsent explicitly set by the client
 - Add onSuccessUpdateEmail parameter
 - Add some server side checks on this parameter
 - Update samples

Questions?
