

The IAB workshop on Environmental Impact of Internet Applications and Systems

Session 4 Monday December 12th, 2022

Future Developments & Next Steps

Ground Rules Reminder

Welcome!

This session is recorded, and the recordings will be published

Your position papers are public

This is a professional meeting, and we expect professional behaviour

Any kind of harassment is not accepted

Remember: This is a diverse group!

- Including people who have no experience of the IETF

Please be polite, explain your viewpoint in an understandable manner, and learn from others' viewpoints

Goals for Today

- A look back at the previous sessions
- Potential future developments in different areas
- Conclusions & next steps
- Workshop next steps
 - Report RFC
 - Future discussions
 - On list & IABOPEN in IETF-116
 - Feedback

Suggestions for this workshop

- **Session 2: What do we (not) know**

- consider water & materials (over)usage, rather than “just” energy & CO2 ; “DATA IS THE NEW OIL”
- put efforts in actual actions, not more measurements: “perfect is the enemy of the good (enough)”

- **Session 3: Improvements**

- consider conservation/decrease/reduction/limitation as a criteria for success (10% less per year!)
- consider “disaster scenarios”, emergency situations & extreme climate as baseline requirements
- beware of techno-optimism, efficiency paradox (https://en.wikipedia.org/wiki/Jevons_paradox) & power-differentials

- **Session 4: Next steps**

- working in solidarity with “frontline communities” (RFC8890) & activists (e.g. <https://irrf.org/gaia>)
- working together with existing organisations in Climate Justice fields (APC,SIGCAS,D4S,ISOC,CCC...)
- small step: adding “Sustainability & Climate Justice Considerations” to each IETF draft!

Today's Agenda

- Summaries (15 min)
 - Big picture (Jari Arkko)
 - What we know & don't know (Colin Perkins)
 - Improvements (Eve Schooler)
- Potential future developments (25 min)
 - Carbon-aware networking (Eve Schooler)
 - Technology - implementations, protocols, open source (Suresh Krishnan)
 - Mobile networks (Beatrice Siccardi)
 - What we should not do (John Mattsson)
 - IETF (Jukka Manner)
- Discussion, conclusions, next steps (40 min)
- Workshop end & next steps (10 min, Jari Arkko)

How to look at what we've learned

Observations

- ...

Useful tools

- ...

Actions that we should take

- ...

Goals that we should have

- ...

Research that needs doing

- ...

Session 1 summary

Observations

- This is much bigger than our tech
- Influences all parts of society
- Inequality, externalized costs, justice
- Improvements come in many forms
- No silver bullet
- We all bring our preconceptions

Useful tools

- Solidarity, sufficiency, awareness
- Not waiting for the perfect solution
- Renewable energy
- Carbon-awareness

Actions that we should take

- Connect IETF with others

Goals that we should have

- Continuous improvement
- Switching goals from “bigger webpages” to
 - (1) Increased usefulness to society
 - (2) Declining emissions from ICT
- It would be useful to have a scenario, timeline, cost for what we need to do – but we don’t have that today

Research that needs doing

- Effects beyond energy (mfg., water)
- Cross-domain carbon awareness
- Business-model impacts (e.g., advertising)
- What’s the actual impact of changes?
