

Summary: Improvements, Implementation, Technology & protocols

- Telemetry & Metrics
 - Metrics on networking
 - Standardize terminology and what is measured
 - Measuring and Improving non-networking areas
 - Measuring impact over product lifecycle
- Energy-aware Routing
 - Pick energy efficient routes
 - Time variant routing
 - Duty cycling
 - Time-shift demand
- Multicast
 - Use/Avoid
- Data Formats
 - Readability/Efficiency tradeoffs
 - Magnitude of impact
- High level thoughts
 - Energy impact visibility to end users
 - Is “good enough” good enough?
 - Design for constrained – most likely usable for non-constrained
 - No such thing as free lunch?
 - Document tradeoffs?
