1700 UTC

Note Well

This is a reminder of IETF policies in effect on various topics such as patents or code of conduct. It is only meant to point you in the right direction. Exceptions may apply. The IETF's patent policy and the definition of an IETF "contribution" and "participation" are set forth in BCP 79; please read it carefully.

As a reminder:

- By participating in the IETF, you agree to follow IETF processes and policies.
- If you are aware that any IETF contribution is covered by patents or patent applications that are owned or controlled by you or your sponsor, you must disclose that fact, or not participate in the discussion.
- As a participant in or attendee to any IETF activity you acknowledge that written, audio, video, and photographic records of meetings may be made public.
- Personal information that you provide to IETF will be handled in accordance with the IETF Privacy Statement.
- As a participant or attendee, you agree to work respectfully with other participants; please contact the ombudsteam (<https://www.ietf.org/contact/ombudsteam/>) if you have questions or concerns about this.

Definitive information is in the documents listed below and other IETF BCPs. For advice, please talk to WG chairs or ADs:

- [BCP 9](#) (Internet Standards Process)
- [BCP 25](#) (Working Group processes)
- [BCP 25](#) (Anti-Harassment Procedures)
- [BCP 54](#) (Code of Conduct)
- [BCP 78](#) (Copyright)
- [BCP 79](#) (Patents, Participation)
- <https://www.ietf.org/privacy-policy/>(Privacy Policy)

Agenda

- 1) Administrative and Agenda Bash (Chairs - 10 min)
- 2) Why are we proposing to do this work? (Jeremie / Mike, 15 minutes)
- 3) Discussion of the problem (15 minutes)
- 4) How are we proposing to address this problem? (Jeremie - 15 minutes)
- 5) Discussion of the possible solution (15 minutes)
- 6) Proposed Charter (15 minutes)
- 7) Proposed Mechanics (10 minutes)
- 8) AOB (10 minutes)

Setting the Stage

- Welcome to our working group forming BoF...
- Continuing our discussion from Philadelphia
- Focusing on the why, what, and how of this problem
- Not engineering the final solution today

Why are we proposing to do this work?

Jeremie/Mike presentation goes here...

The Problem - Discussion

- Are there others who want to summarize their view of the problem?
- Is the problem clear?
- Is there a problem for the IETF to solve?

How are we proposing to address this problem?

Jeremie presentation goes here...

Possible Solutions - Discussion

- Is there agreement that existing IETF work does not address this problem?
- Is there enough work here for a working group in the IETF?
- Are there any high level comments on ways to solve the problem?
 - (Not working group or detailed engineering level of detail)
- Is there sufficient interest in doing this work?
- Who is willing to participate in this work (review drafts and plans to implement)?

Draft Charter

- Draft Charter: <https://github.com/json-web-proofs/json-web-proofs/blob/main/charter-ietf-jose-03.md>
- Minor edits since IETF 114 in Philadelphia
 - Explicitly called out external collaborations
 - No longer presumes JOSE
- Would there be objections to using the draft charter as a starting point?

Mechanics

- Would there be objections to reusing the JOSE mailing list?
 - Leverage existing IETF expertise already on that list.
- Would there be objections to the working group being JOSE?

Next Steps (and AOB)...

- Thanks for coming!
- What should we do in London?
