draft-ietf-stir-passport-rcd-16

STIR Working Group
IETF virtual - 4/22/22

SOMOS®

Changes 15->16

- Fixed Jack's suggested comments

  - Clarified integrity digest is over URI contents for 'icn'

  - Adopted simplified procedures for doing JSON Pointer digest and moved to right place in document

  - Fixed some of the digest example values

SOMOS®

Changes 14->15

- Added a new "icn" key/value to the "rcd" claim, the intent of this is to correspond to the Call-Info purpose of "icon" and provide a default mechanism for adding an image icon for calls. There was a lot of discussion about use of jCard if the only use was for including an image, and i think this hopefully is well received change by all.

- Constraints paragraph -> plan to revert in a 17 if agreed as mentioned on list

SOMOS®

Onward

- Any other issues to discuss?
