SDF additions

(1) Infrastructure

SDF: Mapping files (sdf-mapping)

TO DO: Approach for representing instance information
Tool Support

SDF: Compact Notation (sdf-compact)

→ can be Informational (or used in normative documents?)

Various translation tool descriptions, e.g.: Mapping between YANG and SDF
(3) New qualities: Links

Extended relation information for SDF (asdf-relations)

An sdfType for Links (sdftype-link)

→ Needs some work before WGLC
  — integrate?
  — instance vs. class support?
NEW: Extended information of SDF for Digital Twin (Adding location information)

→ Start discussion
— needs instance vs. class support
