

draft-ietf-core-target-attr

passed WGLC 2023-02-28 (yesterday)

WGLC comments addressed, -02 submitted

- Added Acknowledgements
- Addressed WGLC comments, many editorial improvements
- Point to core-parameters@ for potential discussions
- Removed I-D-based registrations (ship now)

Next: Submit to IESG

CoRE: CoRECONF

- RFC 9254: YANG-CBOR
- In IESG: [CORE-SID](#)
- WGLC passed [CORE-COMI](#)
- WGLC passed [CORE-YANG-LIBRARY](#)

CORE-SID: Status

Rob Wilton's DISCUSS

Many discussions, edits

Difficult to keep feedback cycles short

–20 submitted today

Intended to cover all open items

CORE-SID: Recent Changes

- Lots of editorial updates, YANG clericals, ...
- Added **file status** (un/published) and **item status** (un/stable, obsolete)
- Completed move from rc:yang-data to sx:structure
- Fixed bug in YANG-JSON representation of uint64 in ietf-system.sid example (gap in YANG validation tools)

CORE-SID: Next

- Try to obtain feedback from Rob Wilton
- Next formal steps to be decided by WG chairs

Amusement while we are waiting:

- draft-bormann-cbor-rfc-cddl-models-01 has a [sid.cddl](#)
- draft-bormann-cbor-cddl-csv-02 Appendix A has an example: a CSV version of a .sid file (including CDDL and a PoC converter)
